Available Now! NEW OIL SAFE STORAGE CABINET

Fluid Defense Systems is pleased to offer another new solution to help you elevate your lubrication program to best practice standards.

The **OIL SAFE Storage Cabinet™** will enable you to immediately store, organize and protect all your color coded OIL SAFE, LABEL SAFE™ and GREASE SAFE® lubrication reliability tools in a sturdy, workshop ready storage solution.

- **Unique Tilt-Bins** inside cabinet doors swing forward to allow free access to contents, then tilt back for storage. Tilt-Bins also come with removable dividers to provide flexible storage options for both small and large parts.
- **Removable plastic parts bins** easily clip on and off internal racks and increase storage capacity and speed for small parts selection.
- **Half shelves are adjustable** on 3" centers for storage flexibility.
- **Solid casters** beneath swing-out doors provide smooth door opening and support under heavy loads. Casters and legs provide clearance for forklift access.
- High quality, stainless steel flush mounted T-Handle Door. **Latch with key lock for added security.**
- **Practical cabinet size** of 39" (W) x 27" (D) x 76" (H). Shipping weight approx. 520 lbs.
- **All welded, high quality 14-gauge steel construction**, suitable for storage of your top up lubricant containers and lubrication equipment in the shop. No code rating is required for this lubricant storage capacity and application. Not suitable for storage of fuels and solvents.
- **CABINETS SHIPPED FULLY ASSEMBLED AND READY TO USE !** *Part Number: 930010*
(Cabinet and plastic trays included. Contents are for illustration only.)
- **Other cabinet sizes and configurations available. Price on application.**

INSTANTLY, get your lubricant and equipment storage area looking organized and professional with this high quality OIL SAFE brand product.

Available Now! NEW FLUID SAFETY CABINETS

In addition to the OIL SAFE® Workshop Cabinets, Fluid Defense Systems is pleased to provide the new ENERGY SAFE™ range of versatile Fluid Safety Cabinets ideal for fuels, solvents and lubricant storage. **A perfect compliment to your fluid management area.**

Conforming to **NFPA Fire Code No. 30, OSHA standards** and with shelving that adjusts on 1/2" centers, this versatile range of cabinets can be modified to suit your current and future requirements.

Built-In Quality

- Constructed of **18-gauge steel** with reinforced double walls
- **All-welded, reinforced double wall construction** (with 1 1/2" of insulating air space to offer fire resistant protection)
- **Leak proof 2"** pan bottom prevents leakage from accidental spills
- Ribbed heavy gauge galvanized steel shelves **hold up to 350 lbs.**

Built-In Safety

- Conforms to **NFPA Fire Code No. 30** and **OSHA standards**
- Doors include a **3-point latching device** with built-in key lock for added security
- **Self-closing doors** have fusible link that melts when ambient temperature reaches 160°, releasing the door latch allowing the doors to move to the closed position.
- **Grounding wire** connections standard on all cabinets dissipate static electricity buildup
- **Screened flame arrester vents** on both sides of cabinet with 2" threaded fittings for external exhaust and with fire baffle and cap
- **Large warning labels** on every cabinet

Built-In Efficiency

- Shelves **adjust on 1/2" centers** to maximize storage versatility
- Four adjustable zinc plated leveling legs
- **Other cabinet sizes and configurations available. Price on application**
