## New GREASE FITTING PROTECTOR™

Fluid Defense Systems is pleased to offer another new product innovation to help you elevate your lubrication program to best practice standards.

**LABEL SAFE™ GREASE FITTING PROTECTORS™** save you the cost of equipment failures due to grease contamination or misapplication.

Get the right grease in the right location by color-coding and keep grease fittings clean and protected at the same time.

- 1. 10 different colors** means you have the choice to clearly identify and color-code grease fittings.
- 2. New recessed head design and clear lens cover accessory** enables placement of Label Safe Adhesive ID Labels directly into the head of the Grease Fitting Protector for enhanced identification.
- 3. Create Custom ID Labels** for your Grease Fitting Protectors on-line at [www.labelsafewizard.com](http://www.labelsafewizard.com). Adhesive Grease Fitting Protector Labels are available in 0.5" Circle Size in sheet quantity.
- 4. Firm seal** around grease fitting keeps contaminants out and keeps bearings in service longer.
- 5. New hook design** on head of Grease Fitting Protector also means easy grip and removal of cover – no more broken finger nails or frustration trying to remove traditional plastic fitting covers.
- 6. Made of durable industrial grade materials with UV stabilizers and anti-static additives** means they are built for reliable service.
- 7. Available with 1/4" (6.4 mm) and 13/32" (10.4 mm) diameter holes** to suit most common grease fitting sizes.

**ORDER A FREE GREASE FITTING PROTECTOR STARTER KIT TODAY** at [www.fluiddefense.com](http://www.fluiddefense.com) and start establishing a best practice lubrication program at your workplace!
